

Public Perception and Individual Contribution Towards Air Quality in Oslo, Norway. A Critical Evaluation

By Zaidoon Alsaeed

GRIN Verlag Aug 2015, 2015. Taschenbuch. Book Condition: Neu. 213x151x6 mm. Neuware - Master's Thesis from the year 2014 in the subject Environmental Sciences, grade: Distinction, University of Sunderland (University of Sunderland, Faculty of Applied Science), course: Master Program in Environment, Health and Safety, language: English, abstract: There is a current attention is paying to air quality management in Oslo. This attention appeared in the plan for improving air quality in Oslo, which is passed in 2005 and revised in 2010, on short and long term. To meet the objectives of this plan, public consultation is necessary for the local authorities. Decision makers depend heavily on medical and scientific information, which is uncertain. Therefore, this project examined the perception of Oslo residents towards air quality, and the impacts of air pollution on their lives, health and behaviors. In doing so, people's concerns and their awareness towards air pollution was evaluated as well as the way they perceive the effects of air pollution on their daily outdoor activities. Public behavior was also investigated in order to evaluate their contribution to the issue of air pollution. The research employs quantitative technique by using questionnaire survey which is analyzed by using statistical methods....

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be playful, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
