Reallocation of Water Storage at Federal Water Projects for Municipal and Industrial Water Supply

By Cynthia Brougher, Nicole T Carter

Createspace, United States, 2012. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.Pursuant to congressional authorization, the U.S. Army Corps of Engineers (Corps) and the U.S. Bureau of Reclamation (Reclamation), the agencies with primary responsibility for federal water resources management, operate water projects for specified purposes. In the case of Corps dams and their related reservoirs, Congress generally has limited the use of such projects for municipal and industrial (MI) water supply, but growing MI demands have raised interest in-and concern about-changing current law and reservoir operations to give Corps facilities a greater role in MI water storage. Reallocation of storage from a currently authorized purpose to MI use would change the types of benefits produced by a facility and the stakeholders served, which has led to controversy over project operations at some federal projects. The Corps and Reclamation, therefore, may be authorized to operate federal water projects for MI use under the project-specific authorization statutes. Alternatively, the generally applicable Water Supply Act of 1958 (WSA) authorizes the Corps and Reclamation to include water storage for municipal and industrial use as a project purpose for new and existing projects. The...
